Install Fonts on Linux

- i.e. inside Docker /WSL
- <https://www.google.com/search?q=how+to+install+a+font+on+gnu%2Blinux>
- Most Linux distributions store the system-wide fonts in the “/usr/share/fonts” directory.

script

```
sudo mkdir /usr/share/fonts/truetype/arial
cd /home/rstudio/EXT/_myFONTS/Arial
sudo mv .ttf /usr/share/fonts/truetype/arial
sudo fc-cache -f -v
sudo chgrp rstudio arial + sudo chown rstudio arial
sudo chown rstudio .ttf + sudo chgrp rstudio *.ttf
fc-match arial
```

This result was proved in [?].

Age	Frequency
18–25	15
26–35	33
36–45	22

This manipulates `system_fonts`
